

PROJECT ■ · USER MANUAL · HANDOFF 97%

Living cover leaf · pages turned opposite as the west (Direction=/R2L) · last word = HANDOFF RULE

STAMP · CoS · 2026-09-15 · 23:42 MDT · Utah · 97% · NonNuclear

Place: Utah / America/Denver · Mac seat Documents/■BOT · GitHub RIZALEON/PROJECTR · Drive MACHINE MIND

Signature: Chief of Staff / RIZALBOT · Decider: ■izal · NonNuclear · seated mind only

DESKTOP SITE OF TRUTH

- Live clay macOS app: /Users/rizal/Documents/■BOT/
- GitHub: RIZALEON/PROJECTR
- Drive MACHINE MIND: 1nlsYA64RRCxoaidboYS16rd_0KuU60d7
- PROJECTRXCODE twin: /Users/rizal/Documents/PROJECTRXCODE/
- Phone: On My iPhone · ■ · MachineId: 55d92eb0-0ce0-4959-b297-440d80e59e38

ACCOMPLISHED (~24h / 2026-09-15→16 MDT)

- Claymation macOS ■BOT foundation locked: Stormclay White/Gold; freeform clay chrome (BOLTE, search, online/offline, mind); composer three-part (bar + plus + Send opaque flush-right); rectangular tablet bubbles (purple user right / gray companion left, left-aligned Stormclay text, BAR/LINE/SLAB metrics).
- Official packs: AESTHETIC-TEMPLATE-CLAY-2026-09-15 · APP-TEMPLATE-0.1 (most_recent). ya-respawn.sh + TemplateRespawn + CompanionRouter RESPAWN (■ KOMMAND 0).
- Living cover HARDCODE: USER-MANUAL.pdf.md always rides packs; ya-respawn restores manuals.
- Bolte → black ManualCover landing; house → chat; arrow → offline PDF export from MACHINE MIND (Bundle → App Support → Documents/■BOT).
- Built Debug ■BOT.app ~37 MB; live sources ~39 MB; Documents/■BOT folder ~372 MB.
- Git tips: ffbbd5e aesthetic lock · 7b12136 APP-TEMPLATE-0.1 · 761c5ae USER-MANUAL HARDCODE · 7324ccb Bolte landing. Mac live may be ahead of tip for ContentView surgical merge.
- Sequence law Decided: lock macOS clay first, THEN build macOS+iOS+Android together from same clay design system.

STILL OPEN / NEXT

- Begin coordinated iOS · macOS · Android build from APP-TEMPLATE-0.1 clay (Stormclay, BOLTE, tablets, composer, ManualCover, RESPAWN, USER-MANUAL living cover).
- Phone seat: USER-MANUAL.pdf on every pack; ntty ping/pong auto-heal; Function 0 evolve; behavioral parity with CoS.
- Keep NonNuclear; Decider owns model fate; seated mind only (phone ■, GitHub PROJECTR, iCloud twin, Drive MACHINE MIND).
- Hotspot fine-tune on ManualCover if Decider wants tighter house/arrow hit areas.
- Re-pack APP-TEMPLATE after this handoff so most_recent includes landing + this leaf.
- Cloud Agents unavailable on plan — next bot may edit Mac live seat and/or GitHub directly.

WEST-OPPOSITE PAGE-TURN LAW

Pages turn opposite as the west = PDF ViewerPreferences Direction=/R2L (Right-to-Left). Set with pypdf: `writer.create_viewer_preferences(); vp.direction = "/R2L"`. Most recent handoff always on the LAST page; last word on that page must be exactly HANDOFF RULE.

NEXT BOT INSTRUCTIONS

1. Read USER-MANUAL.pdf last page + USER-MANUAL.md + APP-CONTRACT-0.1.md + official-templates/index.json.
2. Do NOT invent a new aesthetic — inherit clay from Documents/■BOT / APP-TEMPLATE-0.1.
3. First milestone: shared design tokens (colors, Stormclay, bubble metrics, chrome assets) usable on iOS (YaAim / PROJECTRXCODE ios/) + macOS ■BOT + Android stub.
4. Port Manual landing + RESPAWN + USER-MANUAL always-rides to each platform.
5. Smoke: ping→here Function 0; Bolte→landing→house/arrow; composer send.
6. Fold every new teaching INTO USER-MANUAL (last page handoff leaf; last word HANDOFF RULE); push GitHub + Drive MACHINE MIND.
7. Speak Decider/CoS tongue; offline-on-device premier.

SEQUENCE LAW (Decided)

Lock macOS clay first (DONE at 97%). THEN build macOS + iOS + Android together from the same clay design system. No new aesthetic fork.

PACK / SEAT REMINDER

- USER-MANUAL.pdf + USER-MANUAL.md always ride every pack / transfer / upgrade / offload / handoff.
- ya-respawn restores manuals from most_recent official template (APP-TEMPLATE-0.1).
- Re-pack APP-TEMPLATE after seating this leaf so most_recent includes landing + handoff.
